WHEN POWER MEANS BUSINESS

When you choose Makita Outdoor Power Equipment, you choose to be part of something bigger. Our complete line up of cordless outdoor solutions will revolutionise the way you work - empowering you with over a century of knowledge and expertise in crafting the world's most reliable tools. With the support of the world's largest 18V cordless system, you can be sure our Power Garden range will get the job done and more - no petrol or cord needed.

Product Statement

The DLM537X takes the hard work out of mowing lawns thanks to its variable speed self-propelled motor. When you use the self-propelled function it will now engage within 0.5 of a second. This is much more efficient than its previous model DLM533X which took around 3 seconds to engage.

It can hold up to 4x 18V Li-ion batteries and features a convenient battery selection switch allowing the user to quickly jump to the second set of batteries providing minimal hold ups and a maximum mowing area of up to 1,700m² when used with the self-propelled motor.

The 534mm (21") aluminium deck provides added strength while working and the motor will now run constantly at 2,800rpm the entire time it is in use, providing maximum power throughout every job. It features four swing back blades which cut grass efficiently with clippings being collected into the 70L full mesh catcher.

The quiet mode provides versatility, dropping the rpm down to 2,300rpm allowing you to work in the morning or at night or in shared spaces with lower noise output.

DLM533X is replaced by DLM537X

Product Overview

Self-propelled motor with variable speed control

70L cloth catcher with grass level indicator

4 swing back blades

10 stage height adjustment from 20-100mm

Holds 4 x 18V batteries

Heavy duty aluminium deck

534mm (21") cutting capacity

Product Specification Sheet

Grass box capacity	70L
Cutting height adjustment range	20 - 100mm, 10 Heights
No load speed	2,800rpm (Quiet Mode - 2,300rpm)
Max. cutting width	534mm (21")
Recommended mowing area	Self-Propelled – up to 1,700 m ² Push – up to 2,000 m ² * <small>*Measured using 4x 6.0Ah 18V batteries, results may vary</small>
Travelling speed	2.5 – 5.0km/h
Overall length	1,635mm
Skin weight	45kg
Weight (with battery)	47.4kg
Voltage	36V (18Vx2)

- **Self-propelled motor** – with variable speed control allowing you to select the accurate speed between 2.5km/h to 5.0km/h. The self-propelled function engages within 0.5 seconds to make for efficient mowing
- **eXtreme Protection Technology** – is an advanced series of seals and channels to direct dust and moisture away from critical components
- **Heavy duty aluminium deck** – provides greater protection against rust and potential damage from stones or foreign objects
- **70L cloth catcher** – with grass level indicator allows for efficient grass collection
- **534mm (21") cutting capacity with 4 swing back blades** – provides a clean and efficient cut with reduced chance of solid objects being struck and causing damage
- **10 stage height adjustment from 20-100mm** – allows the user to quickly and easily change the cutting height to match the job
- **Holds 4x 18V batteries** – powered by two 18V Li-ion batteries but the convenient battery selection switch allows you to switch to the second set of batteries

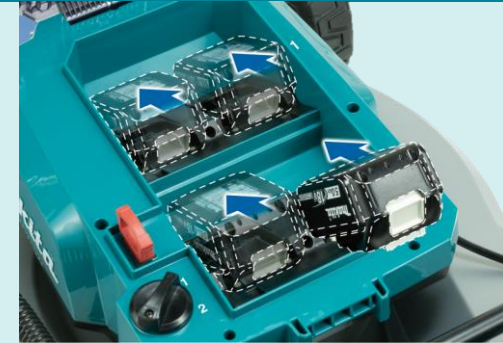

Advantages

Power

High powered brushless motor runs at 2,800rpm to get through tough grass

Runtime

Holds up to 4x 18V batteries for extended runtime

Durability

534mm (21") Aluminium Deck

Control

10 Stage Height Adjustment
20mm – 100mm

Removal of Automatic Torque Drive

The DLM533X featured Automatic Torque Drive technology which kept the rpm of the mower at a low of 2,300rpm until it encountered tough grass, which is when the rpm automatically increases to 2,800rpm.

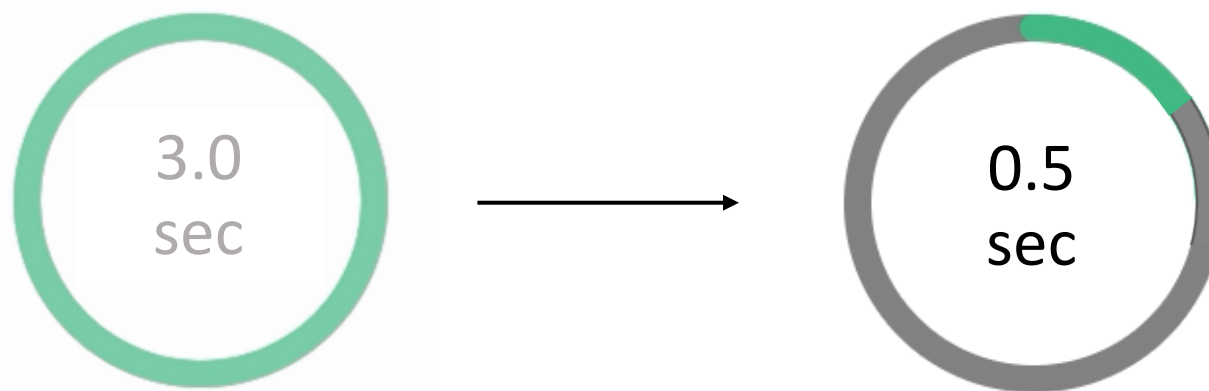

For DLM537X, the Automatic Torque Drive feature has been removed which means the mower will immediately start at 2,800rpm and stay at that level the entire time it is in use.

Reduction of time for Self-Propelled function to engage

When engaging the Self-Propelled function on the DLM533X, on average it took up to 3 seconds for the self-propelled motor to engage after the black bar is depressed.

For DLM537X, the time it takes for the self-propelled function to engage has been reduced to 0.5 seconds allowing for work to begin right when the user wants it to and minimises hold ups whilst working.
