- **Narrow nose tip** – for quick and easy access to desired driving point of the workpiece
- **Anti dry fire** – nailer will not fire when the remaining nails reach between 0 and 3 nails. This protects the workpiece from damage and ensures the user is aware there are no nails remaining
- **Depth driving adjustment** – tool less depth driving adjustment by turning dial
- **Bump fire** – when the trigger is pulled and the contact arm is depressed onto the material a nail is fired
- **Low reaction force mechanism** – enabling easier nailing of longer pins as the reaction force does not push the tool away from the material
- **Ergonomically designed grip** – with the tools center of gravity perfectly balanced in the operators hand
