

Product Statement

18V Brushless Rivet Gun

These rivet guns have been designed for heavy duty industrial applications, for medium to high volume riveting production. They have been designed with superior pulling force with 2 options suited to either large rivet installation or speed of installation

These rivet guns are a powerful cordless solution for heavy duty riveting tasks, ideal for various trades in manufacturing, automotive, window and door manufacturing, metal fabrication, gutter construction, roofing and many more

Product Overview

DRV150 – 18V Brushless 4.8mm Rivet Gun

Product Specification Sheet

DRV150 - 18V Brushless 4.8mm Rivet Gun

Rivet diameter range	4.8mm (3/16") – 2.4mm (3/32")
Pulling Force	10 kN (2,248lbs)
Stroke	25mm
Sound Pressure Level	75 dB
Vibration	2.5 m/s2
Overall length	313mm
Skin weight	1.9kg
Weight (with battery)	2.2kg
Voltage	18V

- Adjustable rivet diameters the DRV150 is capable of pulling rivets up to 4.8mm (3/16") including 4.0mm (5/32"), 3.2mm (1/8") and 2.4mm (3/32")
- Rivet holding mechanism mechanism in the nose piece holds the rivet in place even when working on flat surfaces, preventing the rivet from falling out. Increasing safety and convenience
- LED light after engaging the switch trigger the LED joblight will illuminate and remain on for approximately 10 seconds after the switch is released
- Short center height the height between the top of the tool housing and the centre of the nose cone is only 26mm allows the user to position the head comfortably in tight and narrow places
- **Transparent mandrel box** after installing the rivet, eject the broken off mandrel into the transparent mandrel box by tilting the tool backwards. The box catches each mandrel and the user can see once the container is full and needs to be emptied

Product Overview

DRV250 - 18V Brushless 6.4mm Rivet Gun

Product Specification Sheet

DRV250 - 18V Brushless 6.4mm Rivet Gun

Rivet diameter range	6.4mm* (1/4") – 2.4mm (3/32")
Pulling Force	20 kN (4,496lbs)
Stroke	30mm
Sound Pressure Level	74 dB
Vibration	2.5 m/s2
Overall length	323mm
Skin weight	2.1kg
Weight (with battery)	2.4kg
Voltage	18V

*Not compatible with 6.0mm / 6.4mm stainless rivets

- Adjustable rivet diameters the DRV250 is capable of pulling rivets up to 6.4mm (1/4") including 6.0mm (1/4"), 4.8mm (3/16"), 4.0mm (5/32"), 3.2mm (1/8") and 2.4mm (3/32")
 - Optional accessories required to pull 2.4mm, 3.2mm, 4.0mm rivets
- Rivet holding mechanism mechanism in the nose piece holds the rivet in place even when working on flat surfaces, preventing the rivet from falling out. Increasing safety and convenience
- LED light after engaging the switch trigger the LED joblight will illuminate and remain on for approximately 10 seconds after the switch is released
- Short center height the height between the top of the tool housing and the centre of the nose cone is only 26mm allows the user to position the head comfortably in tight and narrow places
- Transparent mandrel box after installing the rivet, eject the broken
 off mandrel into the transparent mandrel box by tilting the tool
 backwards. The box catches each mandrel and the user can see once
 the container is full and needs to be emptied

Advantages

Runtime

18V Brushless Motor providing more power and extended run-time

Versatility

Short center height allows for working in tight spaces

Efficiency

Transparent mandrel box for easier monitoring of mandrel amount

Power

Heavy duty pulling force of 10kN/20kN

Advantages

DRV150 Vs. DRV250

Due to the DRV250's larger maximum capacity you will notice it has twice the pulling force allowing it to fasten these larger diameter rivets.

Due to this increased capacity and longer stroke length vs. the DRV150, the DRV150 is able to fasten rivets up to 1.8X faster then the DRV250.

Frequently Asked Questions

<u>Installing or removing the head assembly to change rivet diameter</u>

The user must ensure they are using the correct nose piece, jaw, jaw pusher & pipe for each different rivet diameter.

- 1. Loosen the nut of the head and then remove the head
- 2. Loosen the nose piece with a wrench while supporting the head with another wrench
- 3. Loosen the jaw case
- 4. Remove the jaw pusher, spring and pipe

For DRV150

Ri	vet	Nose piece	Jaw pusher		Pipe		Part number of	Jaws

^{1.} Use the jaw case and head for DRV150 as set.

^{*}Click for video instructions

Proper jaws for rivet ø4.8 mm (3/16") are different from DRV250.

Including nose piece, jaw pusher, and pipe.

^{*3.} Stainless steel rivet is not available.

Stalliness steer rivet is not available.
 Proper jaws for rivet ø4.8 mm (3/16") are different from DRV150.

Frequently Asked Questions

Cleaning the jaws and the jaw case

The recommended cleaning interval is every 3,000 rivet installations.

If dust is accumulated, it deteriorates the movement of the jaws and may accelerate wear of the jaws and jaw case. To clean the jaws and jaw case follow the steps below.

- 1. Remove the jaw case.
- 2. Remove the jaws from the jaw case
- 3. Clean the jaws with a brush. Remove any metal powder clogged between the teeth
- 4. Apply supplied grease evenly to the inner jaw case
- 5. Install the jaws to the jaw case
- 6. Install the jaw case and reassemble the head assembly
- 7. Insert rivet into nose piece and remove wiping away any excess grease
