Makita®

320W Variable Speed Multi-Tool

240V

320W Variable Speed Multi-Tool

The TM3000C multi-tool has a 320W motor that provides up to 20,000 oscillations per minute. The TM3000C is also equipped with a variable speed dial allowing users to adjust the speed of oscillation to better suit the application.

The TM3000C can accept a wide range of accessories, and these can be mounted in 12 positions at 30° intervals from 0-360°. During operation, the TM3000C has an oscillation angle of 3.2°, and comes standard with soft start allowing users to better control the tool.

The TM3000C has a 5-metre cord providing the user greater flexibility during operation. The housing has also been ergonomically designed to allow the user to grip the tool in a variety of ways for comfortable operation.

Product Overview

240v

Product Specification Sheet

Oscillations Per Minute	6,000 – 20,000opm
Oscillation Angle, Left/Right	1.6° (3.2° total)
Continuous Rating Input	320W
Vibrations Per Minute	6.5 m/s² (At Plunge Cut)
Head Height	80mm
Overall Length	275mm
Net Weight	1.4kg
Power Supply Cord	5.0m

- **Ergonomic Housing** – The housing has also been ergonomically designed to allow the user to grip the tool in a variety of ways for comfortable operation.
- **On/Off Slide Switch** – The on/off slide switch can be operated with a single finger while gripping the housing.
- **Constant Speed Control** – When under load the on-board electronics will work to maintain the set oscillation speed, thus providing faster cutting under load.
- **3.2° Oscillation Angle** – When an accessory is mounted on the crank housing it will oscillate at a 3.2° angle for efficient cutting, accessories can be mounted in 12 positions at 30° intervals from 0-360° for greater versatility.
- **Hex Wrench Holder** – After changing an accessory the hex key can be mounted in the holder attached to the power cord.
- **Variable Speed Dial** – The variable speed dial located at the back of the tool allows the user to better match the speed to the application.
- **320W Motor** – The 320W motor is capable of up to 20,000 oscillations per minute.
- **Soft Start** – The tool will start slowly before achieving maximum speed offering users better control.

Advantages

240V

Performance

320W motor with variable speed allows users to perform a variety of tasks efficiently.

Practicality

3.2° oscillation angle, accessories can be mounted in 12 positions at 30° intervals

Compatibility

Compatible with a range of OIS accessories for multiple applications.

Ergonomic

Ergonomic housing with on/off slide switch

Standard Accessories

Standard Accessories		
	410047-0	Wrench Holder
	783203-8	Hex Wrench 5
	821538-0	Multitool Accessory Storage Box
