

Elite Specialised TCT Saw Blades

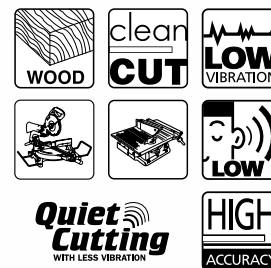

Fine Finishing

The Specialized Silencer saw blades for Mitre and Table Saws have unique patented technology with dampened vibration & quiet running.

Developed to dampen vibration and be super quiet, the features of these blades enhance the work environment and improve both durability of the saw blade and equipment reliability. A lower vibrating blade produces greater cut accuracy and also reduces wobble, giving a beautifully cut surface. This also significantly extends the life of the tungsten carbide teeth beyond that of conventional carbide tipped saw blades.

- Vibration dampening system featuring resin bond filled laser cut body slots
- Precision plate tensioning for a flatter blade and truer cuts
- Ultra low friction coating for effortless cutting and protection from corrosion
