

INSTRUCTION MANUAL

Cordless Stapler

DST111
DST112

Read before use.

SPECIFICATIONS

Model:	DST111		DST112	
Staple width	10 mm			
Applicable staples length	7 mm - 10 mm			
Staple magazine capacity	150 pcs			
Dimensions without hook (L x W x H)	235 mm x 79 mm x 159 mm		235 mm x 79 mm x 165 mm	
Battery cartridge	BL1415, BL1415N	BL1430, BL1430B, BL1440, BL1450, BL1460B	BL1815, BL1815N, BL1820, BL1820B	BL1830, BL1830B, BL1840, BL1840B, BL1850, BL1850B, BL1860B
Net weight	1.5 kg	1.7 kg	1.6 kg	1.8 kg
Rated voltage	D.C. 14.4 V		D.C. 18 V	

- Due to our continuing program of research and development, the specifications herein are subject to change without notice.
- Specifications and battery cartridge may differ from country to country.
- Weight, with battery cartridge, according to EPTA-Procedure 01/2003

Symbols

The following show the symbols used for the equipment. Be sure that you understand their meaning before use.

Read instruction manual.

Only for EU countries
Do not dispose of electric equipment or battery pack together with household waste material!
In observance of the European Directives, on Waste Electric and Electronic Equipment and Batteries and Accumulators and Waste Batteries and Accumulators and their implementation in accordance with national laws, electric equipment and batteries and battery pack(s) that have reached the end of their life must be collected separately and returned to an environmentally compatible recycling facility.

Intended use

The tool is intended for pressing staples into construction materials such as timbers.

Noise

The typical A-weighted noise level determined according to EN60745:

Model DST111

Sound pressure level (L_{pA}) : 76 dB(A)
Uncertainty (K) : 3 dB(A)

The noise level under working may exceed 80 dB (A).

Model DST112

Sound pressure level (L_{pA}) : 76 dB(A)
Uncertainty (K) : 3 dB(A)

The noise level under working may exceed 80 dB (A).

WARNING: Wear ear protection.

Vibration

The vibration total value (tri-axial vector sum) determined according to EN60745:

Model DST111

Vibration emission (a_h) : 2.5 m/s² or less
Uncertainty (K) : 1.5 m/s²

Model DST112

Vibration emission (a_h) : 2.5 m/s² or less
Uncertainty (K) : 1.5 m/s²

NOTE: The declared vibration emission value has been measured in accordance with the standard test method and may be used for comparing one tool with another.

NOTE: The declared vibration emission value may also be used in a preliminary assessment of exposure.

WARNING: The vibration emission during actual use of the power tool can differ from the declared emission value depending on the ways in which the tool is used.

WARNING: Be sure to identify safety measures to protect the operator that are based on an estimation of exposure in the actual conditions of use (taking account of all parts of the operating cycle such as the times when the tool is switched off and when it is running idle in addition to the trigger time).

EC Declaration of Conformity

For European countries only

Makita declares that the following Machine(s):
Designation of Machine: Cordless Stapler
Model No./ Type: DST111, DST112
Conforms to the following European Directives:
2006/42/EC

They are manufactured in accordance with the following standard or standardized documents: EN60745
The technical file in accordance with 2006/42/EC is available from:
Makita, Jan-Baptist Vinkstraat 2, 3070, Belgium
9.9.2015

SAFETY WARNINGS

General power tool safety warnings

⚠ WARNING: Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

Work area safety

1. **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
2. **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.
3. **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

Electrical Safety

1. **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.
2. **Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
3. **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
4. **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.
5. **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
6. **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

Personal Safety

1. **Stay alert, watch what you are doing and use common sense when operating a power tool.**

Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

2. **Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
3. **Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
4. **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
5. **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.
6. **Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing, and gloves away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.
7. **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

Power tool use and care

1. **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.
2. **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
3. **Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
4. **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
5. **Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.
6. **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
7. **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

Battery tool use and care

1. **Recharge only with the charger specified by the manufacturer.** A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.
2. **Use power tools only with specifically designed battery packs.** Use of any other battery packs may create a risk of injury and fire.
3. **When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.
4. **Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help.** Liquid ejected from the battery may cause irritation or burns.

Service

1. **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.
2. **Follow instruction for lubricating and changing accessories.**
3. **Keep handles dry, clean and free from oil and grease.**

Cordless stapler safety warnings

1. **Always assume that the tool contains fasteners.** Careless handling of the stapler can result in unexpected firing of fasteners and personal injury.
2. **Do not point the tool towards yourself or anyone nearby.** Unexpected triggering will discharge the fastener causing an injury.
3. **Do not actuate the tool unless the tool is placed firmly against the workpiece.** If the tool is not in contact with the workpiece, the fastener may be deflected away from your target.
4. **Disconnect the tool from the power source when the fastener jams in the tool.** While removing a jammed fastener, the stapler may be accidentally activated if it is plugged in.
5. **Use caution while removing a jammed fastener.** The mechanism may be under compression and the fastener may be forcefully discharged while attempting to free a jammed condition.
6. **Do not use this stapler for fastening electrical cables.** It is not designed for electric cable installation and may damage the insulation of electric cables thereby causing electric shock or fire hazards.
7. **Always wear safety goggles or safety glasses with side shield, and a full face shield when needed.**
8. **Keep hands and feet away from the ejection port area.**
9. **Always remove the battery cartridge before loading the fasteners, adjustment, inspection, maintenance or after operation is over.**

10. **Make sure no one is nearby before operation.** Never attempt to drive fasteners from both the inside and outside of wall at the same time. Fasteners may rip through and/or fly off, presenting a grave danger.
11. **Watch your footing and maintain your balance with the tool.** Make sure there is no one below when working in high locations.
12. **Check walls, ceilings, floors, roofing and the like carefully to avoid possible electrical shock, gas leakage, explosions, etc. caused by stapling into live wires, conduits or gas pipes.**
13. **Use only fasteners specified in this manual.** The use of any other fasteners may cause malfunction of the tool.
14. **Do not tamper with the tool or attempt to use it for other than driving fasteners.**
15. **Do not operate the tool without fasteners.** It shortens the service life of the tool.
16. **Stop driving operations immediately if you notice something wrong or out of the ordinary with the tool.**
17. **Never fasten into any materials which may allow the fastener to puncture and fly through as a projectile.**
18. **Never actuate the switch trigger and contact element until you are prepared to fasten workpieces.** Never defeat its purpose by securing the contact element back or by depressing it by hand.
19. **Never tamper with the contact element.** Check the contact element frequently for proper operations.

SAVE THESE INSTRUCTIONS.

⚠WARNING: DO NOT let comfort or familiarity with product (gained from repeated use) replace strict adherence to safety rules for the subject product. MISUSE or failure to follow the safety rules stated in this instruction manual may cause serious personal injury.

Important safety instructions for battery cartridge

1. **Before using battery cartridge, read all instructions and cautionary markings on (1) battery charger, (2) battery, and (3) product using battery.**
2. **Do not disassemble battery cartridge.**
3. **If operating time has become excessively shorter, stop operating immediately.** It may result in a risk of overheating, possible burns and even an explosion.
4. **If electrolyte gets into your eyes, rinse them out with clear water and seek medical attention right away.** It may result in loss of your eyesight.
5. **Do not short the battery cartridge:**
 - (1) **Do not touch the terminals with any conductive material.**
 - (2) **Avoid storing battery cartridge in a container with other metal objects such as nails, coins, etc.**

- (3) Do not expose battery cartridge to water or rain.

A battery short can cause a large current flow, overheating, possible burns and even a breakdown.

6. Do not store the tool and battery cartridge in locations where the temperature may reach or exceed 50 °C (122 °F).
7. Do not incinerate the battery cartridge even if it is severely damaged or is completely worn out. The battery cartridge can explode in a fire.
8. Be careful not to drop or strike battery.
9. Do not use a damaged battery.
10. The contained lithium-ion batteries are subject to the Dangerous Goods Legislation requirements.

For commercial transports e.g. by third parties, forwarding agents, special requirement on packaging and labeling must be observed.

For preparation of the item being shipped, consulting an expert for hazardous material is required. Please also observe possibly more detailed national regulations.

Tape or mask off open contacts and pack up the battery in such a manner that it cannot move around in the packaging.

11. Follow your local regulations relating to disposal of battery.

SAVE THESE INSTRUCTIONS.

CAUTION: Only use genuine Makita batteries. Use of non-genuine Makita batteries, or batteries that have been altered, may result in the battery bursting causing fires, personal injury and damage. It will also void the Makita warranty for the Makita tool and charger.

Tips for maintaining maximum battery life

1. Charge the battery cartridge before completely discharged. Always stop tool operation and charge the battery cartridge when you notice less tool power.
2. Never recharge a fully charged battery cartridge. Overcharging shortens the battery service life.
3. Charge the battery cartridge with room temperature at 10 °C - 40 °C (50 °F - 104 °F). Let a hot battery cartridge cool down before charging it.
4. Charge the battery cartridge if you do not use it for a long period (more than six months).

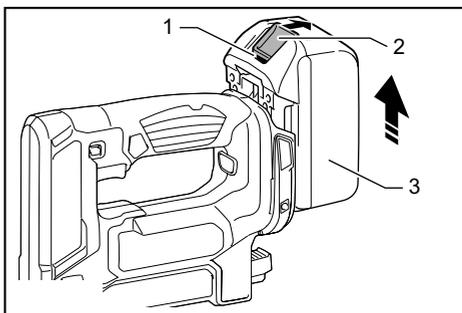

FUNCTIONAL DESCRIPTION

CAUTION: Always be sure that the tool is switched off and the battery cartridge is removed before adjusting or checking function on the tool.

Installing or removing battery cartridge

CAUTION: Always switch off the tool before installing or removing of the battery cartridge.

CAUTION: Hold the tool and the battery cartridge firmly when installing or removing battery cartridge. Failure to hold the tool and the battery cartridge firmly may cause them to slip off your hands and result in damage to the tool and battery cartridge and a personal injury.

► 1. Red indicator 2. Button 3. Battery cartridge

To remove the battery cartridge, slide it from the tool while sliding the button on the front of the cartridge.

To install the battery cartridge, align the tongue on the battery cartridge with the groove in the housing and slip it into place. Insert it all the way until it locks in place with a little click. If you can see the red indicator on the upper side of the button, it is not locked completely.

CAUTION: Always install the battery cartridge fully until the red indicator cannot be seen. If not, it may accidentally fall out of the tool, causing injury to you or someone around you.

CAUTION: Do not install the battery cartridge forcibly. If the cartridge does not slide in easily, it is not being inserted correctly.

Tool / battery protection system

The tool is equipped with a tool/battery protection system. This system automatically cuts off power to the motor to extend tool and battery life. The tool will automatically stop during operation if the tool or battery is placed under one of the following conditions:

Overload protection

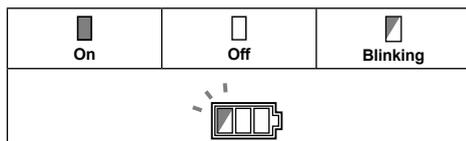

When the tool/battery is operated in a manner that causes it to draw an abnormally high current, the tool automatically stops without any indication. In this situation, turn the tool off and stop the application that caused the tool to become overloaded. Then turn the tool on to restart.

Overheat protection

When the tool/battery is overheated, the tool stops automatically. In this situation, let the tool/battery cool before turning the tool on again.

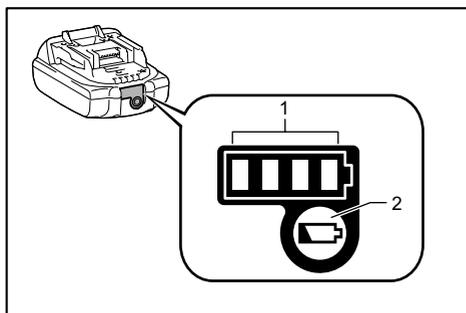

Overdischarge protection

When the battery capacity is not enough, the tool stops automatically and the battery indicator shows following state. In this case, remove the battery from the tool and charge the battery.

Indicating the remaining battery capacity

Only for battery cartridges with "B" at the end of the model number

► 1. Indicator lamps 2. Check button

Press the check button on the battery cartridge to indicate the remaining battery capacity. The indicator lamps light up for few seconds.

Indicator lamps			Remaining capacity
Lighted	Off	Blinking	
■	□	◐	75% to 100%
■	■	■	
■	■	□	
■	□	□	
■	■	□	50% to 75%
■	□	□	25% to 50%
■	□	□	0% to 25%

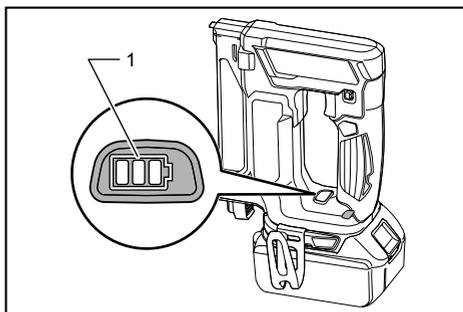

Indicator lamps			Remaining capacity
Lighted	Off	Blinking	
◐	□	◐	Charge the battery.
■	■	□	The battery may have malfunctioned.
■	□	■	

NOTE: Depending on the conditions of use and the ambient temperature, the indication may differ slightly from the actual capacity.

Indicating the remaining battery capacity

Country specific

When you either pull the switch trigger or push the contact element, the battery indicator shows the remaining battery capacity.

► 1. Battery indicator

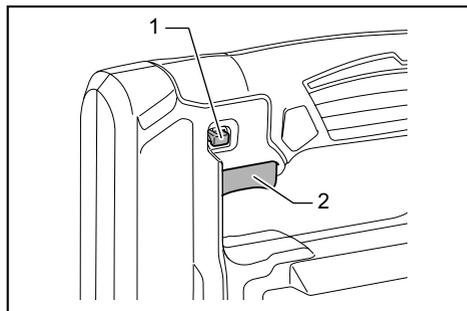

The remaining battery capacity is shown as the following table.

Battery indicator status			Remaining battery capacity
On	Off	Blinking	
■	□	◐	50% - 100%
■	■	□	20% - 50%
■	□	□	0% - 20%
■	□	◐	Charge the battery

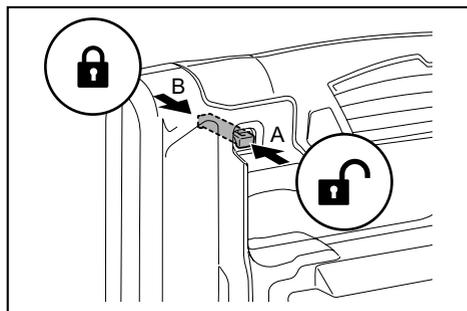

Switch action

⚠ CAUTION: Before installing the battery cartridge into the tool, always check to see that the switch trigger actuates properly and returns to the "OFF" position when released.

⚠ CAUTION: When not operating the tool, depress the trigger-lock button from B side to lock the switch trigger in the OFF position.

► 1. Trigger-lock button 2. Switch trigger

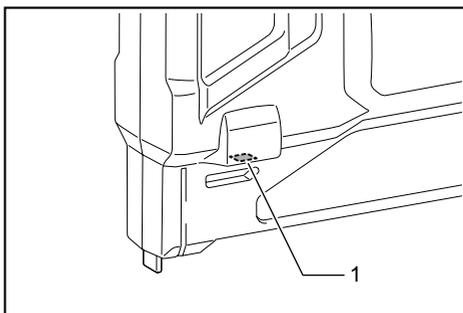

To prevent the switch trigger from accidentally pulled, the trigger-lock button is provided.

To pull the switch trigger, depress the trigger-lock button from A side.

After use, always press in the trigger-lock button from B side.

Lighting up the lamp

⚠ CAUTION: Do not look in the light or see the source of light directly.

► 1. Lamp

Pull the switch trigger or actuate the contact element to light up the lamp. The lamp keeps on lighting while pulling the switch trigger or actuating the contact element. The lamp goes out approximately 10 seconds after releasing the switch trigger and the contact element.

NOTE: Use a dry cloth to wipe the dirt off the lens of the lamp. Be careful not to scratch the lens of lamp, or it may lower the illumination.

ASSEMBLY

⚠ CAUTION: Always make sure that the battery cartridge is removed before carrying out any work on the stapler.

Staples

⚠ CAUTION: Do not use staples other than designated in this manual or staples that appear to be damaged, bent, rusty or corroded.

⚠ CAUTION: Load the same type, size and uniform length of staples when loading multiple strips of staples in the magazine.

NOTICE: Handle the staples and their box carefully. If the staples have been handled roughly, they may be bent out of shape, causing poor staple feed or jamming.

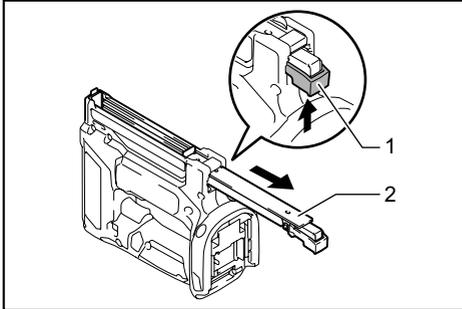

NOTICE: Avoid storing the staples in a very humid or hot place or place exposed to direct sunlight.

Loading staples

⚠ WARNING: When loading staples, always make sure that the battery cartridge is removed from the stapler. Unintentional firing may cause personal injuries and property damage.

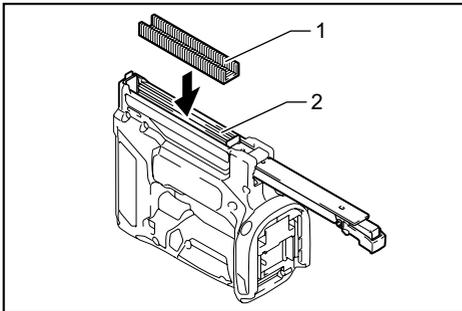

⚠ CAUTION: After loading staples, make sure that the sub magazine is surely closed. Falling staples out of the magazine may cause an injury to the operator or bystander, especially when working in high locations.

1. Remove the battery cartridge.
2. Press the locking lever and slide the sub magazine backward.

► 1. Locking lever 2. Sub magazine

3. Load staples into the main magazine with their feet facing up.

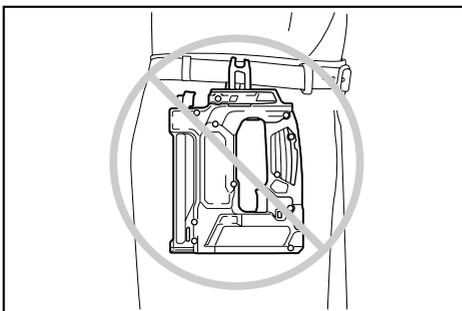

► 1. Staples 2. Main magazine

4. After loading staples, push back the sub-magazine in place until it clicks.

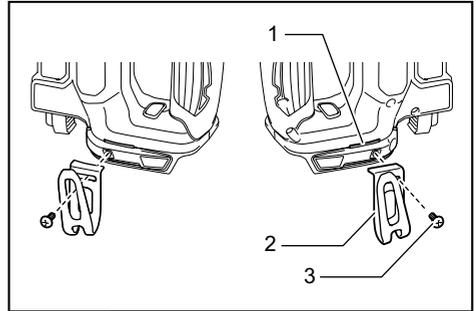

To remove staples, follow the installation procedures in reverse.

Hook

⚠CAUTION: Do not hang the hook from the waist belt. Dropping the stapler, which is caused by the hook accidentally coming out of place, may cause unintentional firing and result in personal injuries.

The hook is convenient for temporarily hanging the tool. This can be installed on either side of the tool. To install the hook, insert it into a groove in the tool housing on either side and then secure it with a screw. To remove, loosen the screw and then take it out.

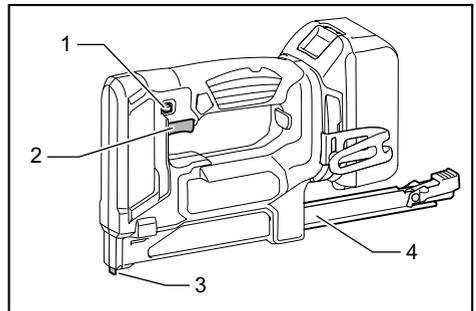

► 1. Groove 2. Hook 3. Screw

OPERATION

Testing the safety system

⚠WARNING: Make sure all safety systems are in working order before operation. Failure to do so may cause personal injuries.

► 1. Trigger-lock button 2. Switch trigger 3. Contact element 4. Sub magazine

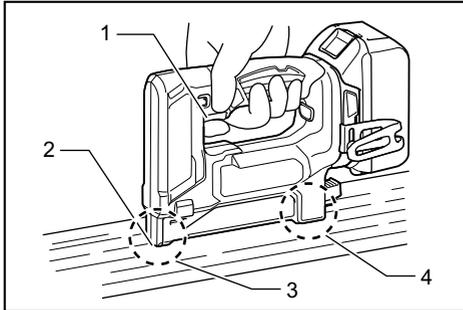

Test safety systems for possible fault before operation as following.

1. Unload the tool with staples and keep the sub magazine opened.
2. Install the battery cartridge.
3. Only pull the switch trigger without touching the contact element against the material.
4. Only touch the contact element against the material without pulling the switch trigger.

If the tool operates in the case of 3 and 4 above, the safety systems are faulty. Stop using the tool immediately and ask your local service center.

Driving staples

⚠ WARNING: Until driving staples completely, always make sure that the contact element placed firmly on the material. Unintentional firing may cause personal injuries.

- ▶ 1. Switch trigger 2. Contact element 3. Front part 4. Rear part

You can operate the tool in either way of “single sequential actuation” or “contact actuation”.

Single sequential actuation:

In this mode, you can drive one staple by one sequential operation.

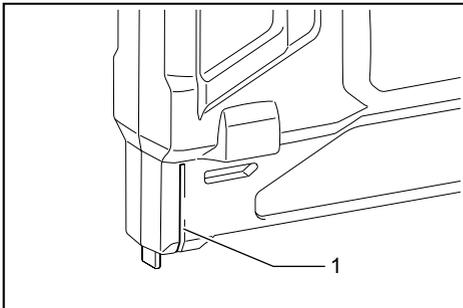

1. Place flat the contact element on the material.
2. Hold both of the front part and the rear part of the tool firmly against the material.
3. Pull the switch trigger fully to drive the staples.
4. Release your finger from the switch trigger before move the contact element from the material.

Contact actuation:

In this mode, you can drive staples repetitively.

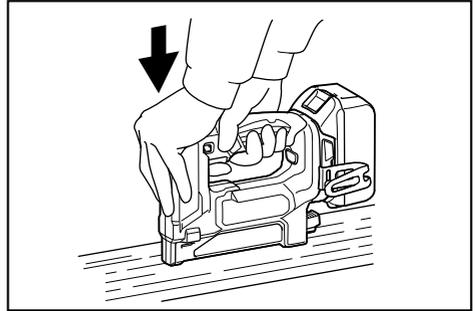

1. Pull the switch trigger.
2. With the switch trigger pulled, place flat the contact element on the material to drive the staples.
3. Move the tool to the next area and place flat the contact element on the material again.

NOTE: The groove indicates the point that staple is driven.

- ▶ 1. Groove

When the head of driven staple remains above the workpiece surface, drive the staple while holding the stapler head firmly.

The material may be unsuitable, if the head of driven staple remains above the workpiece surface although the stapler head is held firmly.

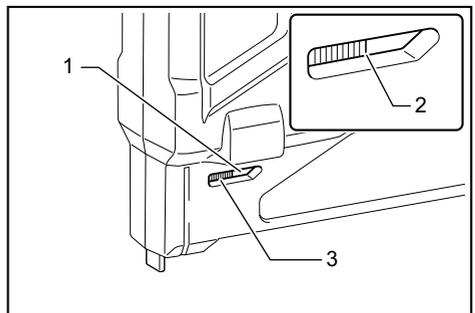

NOTE: Using the stapler continuously with the head of driven staples remaining above the surface of material may cause damage to the driver of the stapler and stapler jamming etc.

Anti dry fire mechanism

⚠ WARNING: When loading staples, always make sure that the battery cartridge is removed from the stapler. Unintentional firing may cause personal injuries and property damage.

This tool is equipped with an anti dry fire mechanism. When the number of remaining staples in the magazine becomes 5 - 8 pcs., the switch trigger can no longer be pulled. At this time, insert a new strip of staples in the magazine. The switch trigger can be pulled again.

Checking remaining staples

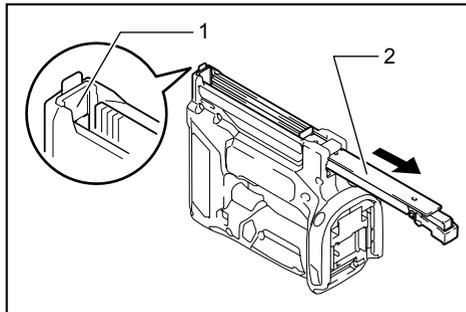

- ▶ 1. Sight window 2. Pusher 3. Staples

Remaining staples can be checked through the sight window.
Reload staples when no remaining staples can be seen in the sight window.

Removing jammed staples

⚠ WARNING: Always make sure that the battery cartridge is removed before removing jammed staples.

Open the sub magazine backward and take out jammed staples from the opening for firing.

► 1. Opening 2. Sub magazine

NOTE: Some items in the list may be included in the tool package as standard accessories. They may differ from country to country.

MAINTENANCE

⚠ CAUTION: Always be sure that the tool is switched off and the battery cartridge is removed before attempting to perform inspection or maintenance.

NOTICE: Never use gasoline, benzine, thinner, alcohol or the like. Discoloration, deformation or cracks may result.

To maintain product SAFETY and RELIABILITY, repairs, any other maintenance or adjustment should be performed by Makita Authorized or Factory Service Centers, always using Makita replacement parts.

OPTIONAL ACCESSORIES

⚠ CAUTION: These accessories or attachments are recommended for use with your Makita tool specified in this manual. The use of any other accessories or attachments might present a risk of injury to persons. Only use accessory or attachment for its stated purpose.

If you need any assistance for more details regarding these accessories, ask your local Makita Service Center.
